In case of indoor leakage, ventilate as much as possible until the cleaning is completed.

Environmental hazard precaution:
Prevent flow out to rivers, etc. so as not to badly affect the environment.

Recovery and neutralization:
For small scale leakage, use absorbent (sawdust, dirt, sand, waste rug) to remove most of the spill and wipe off the rest using waste rug.
For large scale leakage, build bank around the spill and lead the liquid to a safer place for recovery.

Prevention of secondary casualty:
Quickly remove all the combustibles from around the leak spot and provide extinguishers ready for use.
